Attachments: bk 4 10 14 WY Pierce D4_epa_comments.docx

Brad,

I attached some suggested edits from EPA relating to some of the terminology used in the regulatory process. EPA OAQPS communications staff are sensitive to the term "penalties" (or sanctions) to describe the nonattainment designation process, as penalties would only apply if the state failed to meet permitting and planning requirements for non-attainment areas.

Thanks,
Gail

Gail, Ryan and Cara,

I've attached a near final draft of an AQAST press release that one of Tracy Holloway's students (Ben Kuldunski, cc'd) plans to submit by the end of April. Could you please review it for accuracy and provide comments back to Ben, Tracey and I some time next week?

Please feel free to distribute this to other's if you think they should review it as well.

Thanks,

Brad

PS Ben, I've updated the IDEA-I forecast image to a more recent and large amplitude event and made some minor edits from D3 (in track changes)
